

Capacity 32kWh

sufficient to store the daily production of a small photovoltaic installation (up to 8kWp).

Safe LiFePO₄ chemistry

Lithium-iron-phosphate design without cobalt eliminates the risk of rapid temperature rise.

Top cell manufacturers

lifespan up to 8000 cycles.

Intelligent protection

The BMS prevents overcharging, excessive discharging, and ensures operation under optimal conditions.

Connection module

allows installation away from the photovoltaic inverter and distribution board.

Parallel connection

allows for an expansion of the energy storage system's capacity

Voltage and capacity

Nominal voltage	51.2V
Max. operating voltage range	42.0-58.4V
Nominal operating voltage range	48.0-54.4V
Capacity	628Ah 32.154kWh
Cycle life	≥ 8000 cycles*
Efficiency	94%
Configuration	2P16S

Operating conditions

Charge temperature	0°C~40°C
Discharge temperature	-5°C~40 °C
Storage < 3m	-5°C~35 °C
Storage > 6m	25°C
Humidity	5~80%
Altitude	<3000m

Charge and discharge

Model	32/180	32/150	32/100
Nominal charge current	180A	150A	100A
Max. charge current	200A**	170A	120A
Nominal charge power	9.21 kW	7.68 kW	5.12 kW
Nominal discharge current	180A	150A	120A
Max. discharge current	200A**	170A	120A
Nominal discharge power	9.21kW	7.68 kW	5.12 kW

Others

Dimensions HxWxD	829x800x280mm
Communication	CAN/RS485/Bluetooth
Weight	210 kg

*Under recommended operating conditions.

** At temperatures of 25 ± 2°C
