# HOME 16

# Capacity 16kWh

sufficient to store the daily production of a small photovoltaic installation (up to 4kWp).

### Intelligent protection

The BMS prevents overcharging, excessive discharging, and ensures operation under optimal conditions.

### Safe LiFePO<sub>4</sub> chemistry

Lithium-iron-phosphate design without cobalt eliminates the risk of rapid temperature rise.

### **Connection module**

allows installation away from the photovoltaic inverter and distribution board.

## Top cell manufacturers

lifespan up to 8000 cycles.

### **Parallel connection**

allows for an expansion of the energy storage system's capacity

### **SECURITY FEATURES**

- ★ Single cell overvoltage
- ✗ Single cell undervoltage
- ✗ Battery pack overvoltage
- Battery pack undervoltage
- ✗ Battery pack overtemperature
- ✗ Battery pack undertemperature
- ✗ Overcurrent protection
- $oldsymbol{arkappa}$  Overcharge and over-discharge protection
- ✗ Short-circuit protection

### technical specification

### Voltage and capacity

| Nominal voltage                 | 51.2V             |  |  |
|---------------------------------|-------------------|--|--|
| Max. operating voltage range    | 42.0-58.4V        |  |  |
| Nominal operating voltage range | 48.0-54.4V        |  |  |
| Capacity                        | 314Ah   16.076kWh |  |  |
| Cycle life                      | ≥ 8000 cycles*    |  |  |
| Efficiency                      | 94%               |  |  |
| Configuration                   | 1P16S             |  |  |

### **Operating conditions**

| Charge temperature    | temperature 0°C~40°C |  |
|-----------------------|----------------------|--|
| Discharge temperature | -5°C~40 °C           |  |
| Storage < 3m          | -5°C~35 °C           |  |
| Storage > 6m          | 25°C                 |  |
| Humidity              | 5~80%                |  |
| Altitude              | <3000m               |  |

### Charge and discharge

| Model                     | 16/140  | 16/90   | 16/60   |
|---------------------------|---------|---------|---------|
| Nominal charge current    | 140A    | 140A    | 140A    |
| Max. charge current       | 160A**  | 160A**  | 160A**  |
| Nominal charge power      | 7.68kW  | 7.68kW  | 7.68kW  |
| Nominal discharge current | 140A    | 120A    | 90A     |
| Max. discharge current    | 140A    | 120A    | 90A     |
| Nominal discharge power   | 7.168kW | 4.608kW | 3.072kW |

### Others

| Dimensions HxWxD | 817×412×267mm       |  |
|------------------|---------------------|--|
| Communication    | CAN/RS485/Bluetooth |  |
| Weight           | 113 kg              |  |

<sup>\*</sup>Under recommended operating conditions.
